Team	Feedback	Response
ThriveToday (Found on our own)	Backend hosting using DigitalOcean on an ip address causes browsers like Google Chrome to not trust storing session cookies locally, and because of this when a user refreshes the page they are logged out.	**Expected date for fix**: Thursday, May 11, 2023 **Status: FIXED**
Gladiators	Actually editing and adding to a plan has been buggy and no code for this feature has been pushed to the working branch yet.	**Expected date for fix:** Saturday, April 29, 2023 **Status: FIXED** Editing and adding has already been coded in the backend, we just need to add functionality for it to work on the frontend.
