Team Name/Project Title: ThriveToday

This Weeks Leader: Alan Luu

Members: Alan Luu (Lead), Jeremy Esch, Henry Fan, Taylor Trinidad

Job Assignments:
Jeremy: Frontend/Project Setup
Henry: Backend
Taylor: Backend/UI Design
Alan: Backend/Database

Milestones with deadlines:
Milestone 4: Begin coding frontend and backend (Deadline: 3/4)
Milestone 5 (next week): Start testing API and set up local hosting (Deadline: 3/18)
Milestone 6: Connect database to backend and start on responsive frontend design (Deadline: 4/1)
Milestone 7: Integrate frontend with backend through Axios API request library (Deadline: 4/15)
Milestone 8: Prototype (Deadline: 4/29)

Technologies:
Frontend: React/Create React App (Dev build tool), Material UI for styling, Axios for API requests
Backend: Node.js as backend, Express.js for routing, PostgreSQL database for storage
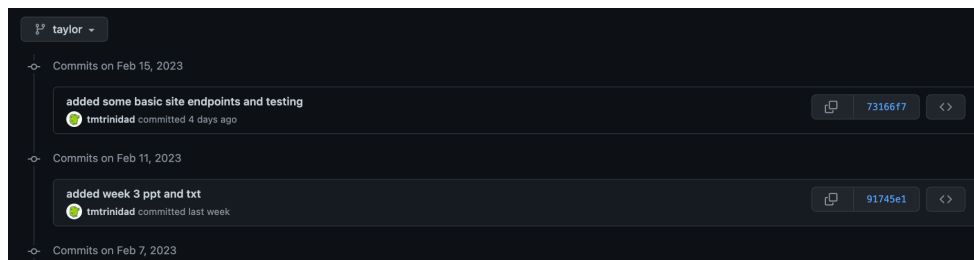

Tasks Accomplished Per member:
- Jeremy
    - Created UI website mockup
    - Finished home page and navbar with responsive styling
    - Created React-router-dom routing
    - Next tasks:
        - Update navbar and home page to new design
        - Start on routing and state management handling
- Henry
    - NodeJS and github onboarding
    - Next tasks:
        - Understand our backend
        - coding something related to database and pushing to git
        - continue to read and write to clarify my own thinking on what our website will do for our users
- Taylor
    - Set up backend and schema
    - Next tasks:
        - Begin working with the database/testing

- - - ■ Add more endpoints as needed
      - ■ Research more UI themes
  - ● Alan
    - ○ Almost finalized database setup and schema
    - ○ Implemented connection to database from backend code
    - ○ Next tasks:
      - ■ Continue working on backend/database stuff
      - ■ Insert sample data for website into the database

Github Activity:
(Most work is still being done on individual branches and haven't been committed yet)

Accomplished Milestones:
- ● Set up frontend
  - ○ Finalized UI mockups for logo and main page
  - ○ Mockup of plans page
- ● Set up backend
  - ○ Test endpoints have been successfully set up
- ● Set up database
  - ○ Database for our website is hosted on a remote server that can be accessed using the right credentials

Conclusions from weekly meetings:
- ● UI design of website is pretty much finalized at this point.
- ● We are on track with our milestones.
- ● Backend/database tests are working and good to go, next step is to implement backend code.

Weekly Meetings:
- ● Last week: 2/14 (12 pm) mini backend meeting
- ● Last week: 2/16 (1pm) mini progress check-in meeting
- ● We also meet every Sunday every 3pm on Discord, and sometimes we also meet on Tuesdays and Thursdays either in-person or on Discord.
